PAMELA ZIP-ST-HIGH

Post-surgical bra with high pressure level

Style	45010	White
	45009	Rose Nude
	45011	Black

Sizes 10/12; 14/16; 18/20; 22/24; 26/28; 30/32

Cups Universal

Material 98% polyamide, 2% elastane

Indication After various breast surgeries

- Made with seamless circular knitting technology and high cotton content for a precise fit and wearing comfort
- Hygienically prepared for direct clinical use through a pre-washing process
- Immobilises and stabilises the post-surgical site through special knitted zones on the underside of the cup
- Special knitted zones and a high pressure level support lymphatic drainage and the healing process
- Pre-formed and flexible seamless cups ensure stabilisation of the post-surgical breast area with even all-over pressure (no fixation ring around the cup)
- Adjustable, broad straps with hook and loop fasteners for easy dressing and undressing provide exceptional comfort
- Zip front closure for easy access to surgical site with an interior hook and eye placket for added security
- Soft fleece on back to securely position an Amoena compression belt (sold separately, see p. 19)
- Cup pockets can hold a post-surgical form securely in place
- Re-positionable Drain Pouch can attach to bottom band (sold separately, p. 23)
- Use in combination with CuraScar Silicones for healing scar therapy (see p. 29)

COMPRESSION BELT

To be used with CuraSupport Compression

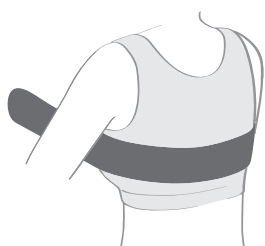

Style	776N	White
	789N	Black

Sizes 8-32

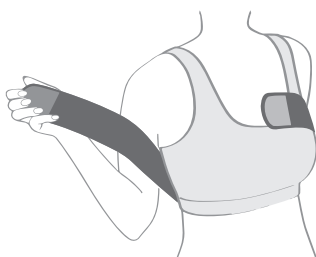

Material 72% polyamide, 14% polyester, 8% cotton, 6% elastane

Indication After breast reconstruction with implant, augmentation with implant

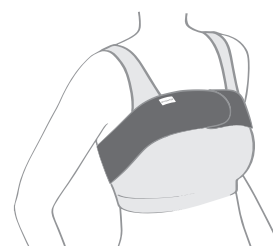

- Developed to achieve optimal surgical results by keeping the operated breast(s) in place and preventing implants from moving during the healing process
- Anatomically shaped with strong, stretchable material for optimal fit and compression of upper breast area
- Skin-friendly fabrics reduce irritation and the softer hook and loop front closure allows easy individual fitting
- Soft fleece at the centre back allows it to attach securely to a CuraSupport Compression bra.
- Can be used with any bra or bandage
- Use in combination with CuraSupport Compression and CuraScar Silicones for healing scar therapy (see p. 15-19, 27-29)

The Amoena Compression Belt is fitted in the back at the same height as a bra.

In the front, the belt sits above the cleavage.

The belt is properly in place when the Amoena label is readable when you look down to your right.
